BA in Philosophy (Fall 2024 & Later)

In our increasingly complex and dynamic culture, the growth of novel and changing ideas unsettles traditional patterns of thought and action. As a result, the role of philosophy becomes more vital, for it addresses the conflict between the enduring insights of the past and the new discoveries and theories of the present in an attempt to attain a coherent philosophy of life. Combining historical and thematic approaches, the program seeks to enrich the student's life experience by making available the broad and generous ideas that have shaped the contemporary intellectual world. Awareness of the traditional philosophical forces of the past is a precondition for understanding the ideological trends of today.

The program provides a broad range of electives, dealing with historical movements, great philosophical figures of the past and present, perennial philosophical themes, and contemporary issues. Courses are offered in the major branches of philosophy: logic, epistemology, ethics, anthropology, and metaphysics, among others.
